

Elie Dale

I visited Hilary Haynes for acupuncture eight times to compliment my IVF treatment. I found the Hilary to be a committed professional who understood the pressures of IVF and was flexible enough to fit her treatment around my IVF even when it meant last minute appointments at difficult times. She immediately helped to relax both myself and my partner and her understanding and experience of IVF meant she was able to provide fantastic support throughout the process, which helped us stay relaxed. Hilary is experienced and knowledgeable in using acupuncture to assist the process of IVF and adjusts her practice in line with the latest research. I always felt in very good hands with her and would warmly recommend her to anyone undergoing IVF.
